We were thinking of you
when we made this product

Welcome to the world of Electrolux

You've chosen a first class product from Electrolux, which hopefully will provide you with lots of pleasure in the future. Electrolux ambition is to offer a wide variety of quality products that would make your life even more comfortable. You can look at some examples on the cover in this manual. But now it's time to study this manual and start using and enjoying the benefits from your new machine. We promise that it'll make your life a little easier. Good luck!

The following symbols are used in this manual:

Important information concerning your personal safety and information on how to avoid damaging the appliance.

General information and tips

Environmental information

The symbol  on the product or on its packaging indicates that this product may not be treated as household waste. Instead it shall be handed over to the applicable collection point for the recycling of electrical and electronic equipment. By ensuring this product is disposed of correctly, you will help prevent potential negative consequences for the environment and human health, which could otherwise be caused by inappropriate waste handling of this product. For more detailed information about recycling of this product, please contact your local city office, your household waste disposal service or the shop where you purchased the product.

SAFETY INFORMATION

It is most important that this instruction book should be retained with the appliance for future reference. Should the appliance be sold or transferred to another owner, or should you move house and leave the appliance, always ensure that the book is supplied with the appliance in order that the new owner can be acquainted with the functioning of the appliance and the relevant warnings.

If this appliance featuring magnetic door seals is to replace an older appliance having a spring lock (latch) on the door or lid, be sure to make that spring lock unusable before you discard the old appliance. This will prevent it from becoming a death-trap for a child.

These warnings are provided in the interest of safety. You must read them carefully before installing or using the appliance.

General Safety

- This appliance is designed to be operated by adults. Children should not be allowed to tamper with the controls or play with the product.
- It is dangerous to alter the specifications or modify this product in any way.
- Before any cleaning or maintenance work is carried out, be sure to switch off and unplug the appliance.
- This appliance is heavy. Care should be taken when moving it
- Ice lollies can cause frost burns if consumed straight from the appliance.
- **Take utmost care when handling your appliance so as not to cause any damages to the cooling unit with consequent possible fluid leakages.**
- **The appliance must not be located close to radiators or gas cookers.**
- **Avoid prolonged exposure of the appliance to direct sunlight.**
- **There must be adequate ventilation round the back of the appliance and any damage to the refrigerant circuit must be avoided.**
- **For freezers only (except built-in models): an ideal location is the cellar or basement.**
- **Do not use other electrical appliances (such as ice cream makers) inside of refrigerating appliances.**

Service/Repair

- Any electrical work required to install this appliance should be carried out by a qualified electrician or competent person
- This product should be serviced by an authorized Service Centre, and only genuine spare parts should be used.
- Under no circumstances should you attempt to repair the appliance yourself. Repairs carried out by inexperienced persons may cause injury or more serious malfunctioning. Refer to your local

Service Centre, and always insist on genuine spare parts.

- This appliance contains hydrocarbons in its cooling unit; maintenance and recharging must therefore only be carried out by authorized technicians.

Use

- The domestic refrigerators and freezers are designed to be used specifically for the storage of edible foodstuffs only.
- Best performance is obtained with ambient temperature between +18°C and +43°C (class T); +18°C and +38°C (class ST); +16°C and +32°C (class N); +10°C and +32°C (class SN). The class of your appliance is shown on its rating plate.

Warning: when the ambient temperature is not included within the range indicated for the class of this appliance, the following instructions must be observed: when the ambient temperature drops below the minimum level, the storage temperature in the freezer compartment cannot be guaranteed; therefore it is advisable to use the food stored as soon as possible.

- Frozen food must not be re-frozen once it has been thawed out.
- Manufacturers' storage recommendations should be strictly adhered to. Refer to relevant instructions.

- The inner lining of the appliance consists of channels through which the refrigerant passes. If these should be punctured this would damage the appliance beyond repair and cause food loss. **DO NOT USE SHARP INSTRUMENTS** to scrape off frost or ice. Frost may be removed by using the scraper provided. Under no circumstances should solid ice be forced off the liner. Solid ice should be allowed to thaw when defrosting the appliance.
- Do not place carbonated or fizzy drinks in the freezer as it creates pressure on the container, which may cause it to explode, resulting in damage to the appliance. Do not use a mechanical device or any artificial means to speed up the thawing process other than those recommended by the manufacturer. Never use metal objects for cleaning your appliance as it may get damaged.

Installation

- During normal operation, the condenser and compressor at the back of the appliance heat up considerably. For safety reasons, minimum ventilation must be as shown in the instructions.

Attention: keep ventilation openings clear of obstruction.

- Care must be taken to ensure that the appliance does not stand on the electrical supply cable.

Important: if the supply cord is damaged, it must be replaced by a special cord or assembly available from the manufacturer or its service agent.

- If the appliance is transported horizontally, it is possible that the oil contained in the compressor flows in the refrigerant circuit. It is advisable to wait at least two hours before connecting the appliance to allow the oil to flow back in the compressor.
- There are working parts in this product which heat up. Always ensure that there is adequate ventilation as a failure to do this will result in component failure and possible food loss. See installation instructions.
- Parts which heat up should not be exposed. Wherever possible the back of the product should be against a wall.

Environment Protection

This appliance does not contain gasses which could damage the ozone layer, in either its refrigerant circuit or insulation materials. The appliance shall not be discarded together with the urban refuse and rubbish. Avoid damaging the cooling unit, especially at the rear near the heat exchanger. Information on your local disposal sites may be obtained from municipal authorities. The materials used on this appliance marked by the symbol  are recyclable.

iUSE

Cleaning the interior

Before using the appliance for the first time, wash the interior and all internal accessories with luke-warm water and some neutral soap so as to remove the typical smell of a brand-new product, then dry thoroughly.

 **Do not use detergents or abrasive powders, as these will damage the finish.**

Control panel

C - Temperature and function indicator

D - Function button

E - Confirmation button

Display

Excessive temperature alarm

If on the temperature indicated is the ambient temperature

negative Temperature indicator

Temperature indicator

If on the Child Lock function is on

If on the function timer is on

If on the Drinks Chill function is on

If on the Action Freeze function is on

If on the Eco Mode function is on

First switch on

After plugging the plug into the power outlet, if the display is not illuminated, press key (A), appliance on.

As soon as the appliance is turned on, it is in alarm condition, the temperature flashes and you will hear a buzzer.

Press key (E) and the buzzer will go off (also see the section on "excessive temperature

alarm") the icon still flashes and on

the indicator will appear

the warmest temperature reached.

For a correct storage of the food select the Eco Mode function that guarantee the following temperature is set:

-18°C in the freezer

- Wait until the inside compartment temperature reach -18°C, before introducing the goods in the freezer compartment.
- To select a different temperature see "Temperature regulation".

Switching off

The appliance is shut off by pressing key (A) for more than 1 second. During this, a countdown of the temperature from -3 -2 -1 will be shown.

Temperature regulation

The temperature may be regulated by pressing the key B.

By pressing the key B the current temperature setting flashes on the indicator and by pressing the key B again it is possible to change it. You confirm the choice of the temperature either by pressing the key E, (you will hear the buzzer) or by waiting for some seconds (you will not hear the buzzer).

Then the indicator shows again the inside compartment temperature.

The newly selected-temperature must be reached after 24 hours.

After a long period out of use it is not necessary to set again the temperature because it remains stored.

Attention!

During the stability period by the first starting the temperature displayed can not correspond to the setting temperature. During this time it is possible that the temperature displayed is different than the setting temperature.

Functions Menu

By activating the key D the functions menu is operating.

Each function could be confirmed by pressing button E. If there is no confirmation after some seconds the display will go out from the menu and return in normal condition.

The following functions are indicated:

Ambient Temperature

Child Lock function

Eco Mode function

Action Freeze function

Drinks Chill function

Ambient Temperature Function

The ambient temperature function is activated by pressing key D (several times if necessary) until the

corresponding icon appears .

In this condition the displayed temperature is the ambient temperature.

You must confirm the choice by pressing key E within few seconds.

You will hear the buzzer and the icon remains lighted.

It is possible to de-activate the function at any time by pressing key D until the corresponding icon will flash and then key E.

Child Lock Function

The Child Lock function is activated by pressing key D (several times if necessary) until the corresponding icon

appears .

You must confirm the choice by pressing key E within few seconds.

You will hear the buzzer and the icon remains lighted.

In this condition any possible operation through the keys does not cause any change as long as this function is activated.

It is possible to de-activate the function at any time by pressing key D until the corresponding icon will flash and then key E.

It is possible to de-activate the function at any time by pressing key D until the corresponding icon will flash and then key E.

Eco Mode Function

The Eco mode function is activated by pressing key D (several times if necessary) until the corresponding icon appears  (or setting the temperature at -18°C).

You must confirm the choice by pressing key E within few seconds. You will hear the buzzer and the icon remains lighted.

In this condition the chosen temperatures are automatically set (-18°C), in the best conditions for storing food.

It is possible to de-activate the function at any time by changing the selected temperature in the compartment.

Action Freeze Function

The freezer compartment is suitable for long term storage of commercially frozen and deep-frozen food, and for freezing fresh food.

The maximum quantity of foods to freeze in 24 hours is shown on the serial number plate.

To freeze the amount of food indicated on the serial number plate, place the food directly in touch with the cooling surface (remove the drawer or basket). In case the food is frozen inside the drawers or baskets, the maximum quantity is slightly reduced.

To freeze fresh foods, you will need to activate the Action Freeze function. Press key D (several times if necessary) until the corresponding icon appears .

You must confirm the choice by pressing key E within few seconds. You will hear the buzzer and on the display will appear some animation with lines.

After a pre-cooling period of 24 hours, place the foods in the freezer.

Place the food to be frozen in the  compartment, as this is the coldest point.

The freezing process takes 24 hours. During this period do not put other foods in the freezer.

This function stops automatically after 52 hours.

It is possible to de-activate the function at any time by pressing key D until the corresponding icon will flash and then key E.

Drinks Chill Function

The Drinks Chill function is to be used as a safety warning when placing bottles in the freezer compartment. It is activated by pressing key D (several times if necessary) until the

corresponding icon appears .

You must confirm the choice by pressing key E within few seconds. You will hear the buzzer and the icon remains lighted.

In this condition it operates a timer with a default value of 30 min and it could change from 1 to 90 min, by pressing key B you select the minutes needed.

At the end of the selected time there are the following indications:

- on the indicator  the symbol  flashing ;
- the icon  flashing ;
- the icon  flashing;
- sounding of an acoustic alarm until key E is pressed.

At this point bear in mind to remove the drinks contained in the freezer compartment.

It is possible to de-activate the function at any time by pressing key D until the corresponding icon will flash and then key E.

Use of the freezer compartment

The freezer is provided with the symbol

which means that it is suitable for freezing fresh food and for long term storage of frozen and deep-frozen food.

The temperature may be regulated between -15°C and -24°C.

We suggest setting the internal temperature of approximately -18°C, which guarantees proper freezing and conservation of the frozen foods.

Attention!

During the stability period by the first starting the temperature displayed can not correspond to the setting temperature. During this time it is possible that the temperature displayed is different than the setting temperature.

Attention!

Difference between the temperature displayed and temperature setting is normal. Especially when:

- a new setting has recently been selected
- the door has been left open for a long time
- warm food has been placed in the compartment

Difference until 5°C inside the compartment are quite normal.

During normal functioning the indicator shows the warmest temperature inside the compartment.

Storage of frozen food

When first starting-up or after a period out of use, before putting the products in the compartment let the appliance run at least 12 hours. To obtain the best performance from this appliance, you should:

if large quantities of food are to be stored, remove all drawers and baskets from appliance and place food on cooling shelves.

Pay careful attention not to exceed load limit stated on the side of the upper

section (where applicable)  .

Important

In the event of accidental defrosting, for example due to a power failure, if the power has been off for longer than the value shown in the technical characteristics chart under "rising time", the defrosted food must be consumed quickly or cooked immediately and then refrozen (after cooling).

Excessive temperature alarm

An increase in the temperature in a compartment (for example due to an power failure) is indicated by:

- flashing temperature;
- flashing of the icon  ;
- sounding of buzzer.

When normal conditions are restored:

- the acoustic signal shuts off;

- the temperature value continues to flash;

When you press key "E" to de-activate the alarm, the highest temperature reached in the compartment appears

on indicator  for some seconds.

Then it returns on the normal operation showing the temperature of the selected compartment.

During the alarm phase, the buzzer can be switched off by pressing key E.

Freezing Calendar

The symbols show different types of frozen goods.

The numbers indicate storage times in months for the appropriate types of frozen goods. Whether the upper or lower value of the indicated storage time is valid depends on the quality of the foods and pre-treating before freezing.

Thawing

Deep-frozen or frozen food, prior to being used, can be thawed in the refrigerator or at room temperature, depending on the time available for this operation.

Small pieces may even be cooked still frozen, directly from the freezer: in this case, cooking will take longer.

Ice-cube production

This appliance is equipped with one or more trays for the production of ice-cubes. Fill these trays with water, then put them in the freezer compartment.

Do not use metallic instruments to remove the trays from the freezer.

Cold accumulators

2 cold accumulators are supplied in the freezer; these increase the length of time for which food will keep in the event of a power failure or breakdown. They must be placed in the top

drawer

HINTS

Hints for freezing

To help you make the most of the freezing process, here are some important hints:

- the maximum quantity of food which can be frozen in 24 hrs. is shown on the rating plate;
- the freezing process takes 24 hours. No further food to be frozen should be added during this period;
- prepare food in small portions to enable it to be rapidly and completely frozen and to make it possible subsequently to thaw only the quantity required;
- wrap up the food in aluminium foil or polythene and make sure that the packages are airtight;

- do not allow fresh, unfrozen food to touch food which is already frozen, thus avoiding a rise in temperature of the latter;
- water ices, if consumed immediately after removal from the freezer compartment, can possibly cause the skin to be freeze burnt;
- it is advisable to show the freezing-in date on each individual pack to enable you to keep tab of the storage time;
- **do not put carbonated liquids (fizzy drinks, etc.) in the freezer compartment as they may burst.**

Hints for storage of frozen food

To obtain the best performance from this appliance, you should:

- make sure that the commercially frozen foodstuffs were adequately stored by the retailer;
- be sure that frozen foodstuffs are transferred from the foodstore to the freezer in the shortest possible time;
- not open the door frequently or leave it open longer than absolutely necessary.
- Once defrosted, food deteriorates rapidly and cannot be refrozen.
- Do not exceed the storage period indicated by the food manufacturer.

MAINTENANCE

Unplug the appliance before carrying out any maintenance operation.

Warning

This appliance contains hydrocarbons in its cooling unit; maintenance and recharging must therefore only be carried out by authorized technicians.

Periodic cleaning

Clean the inside with warm water and bicarbonate of soda.

Rinse and dry thoroughly.

Do not pull, move or damage any pipes and /or cables inside the cabinet .

Clean the condenser (black grill) and the compressor at the back of the appliance with a brush or a vacuum cleaner. This operation will improve the performance of the appliance and save electricity consumption.

Many proprietary kitchen surface cleaners contain chemicals that can attack/damage the plastics used in this appliance. For this reason it is recommended that the outer casing of this appliance is only cleaned with warm water with a little washing-up liquid added.

Periods of non-operation

When the appliance is not in use for long periods, take the following precautions:

- remove the plug from the wall socket;
- remove all food;
- defrost and clean the interior and all accessories;
- leave the door ajar to allow air to circulate to prevent unpleasant smells.

Defrosting

The freezer compartment is a "no frost" type. This means that there is no buildup of frost when it is in operation, neither on the internal walls nor on the foods.

The absence of frost is due to the continuous circulation of cold air inside the compartment, driven by an automatically controlled fan.

TECHNICAL INFORMATION

Net Freezer Capacity lt.	254
Energy Consumption kWh/24h	0,849
Energy Consumption kWh/year	310
Freezing Capacity kg/24h	20
Rising time	20
Dimensions mm	
High	1800
Width	600
Depth	645

The technical information are situated in the rating plate on the internal left side of the appliance .

CUSTOMER SERVICE
AND SPARE PARTS

If the appliance is not functioning properly, check that:

- the plug is firmly in the wall socket and the mains power switch is on;
- there is an electricity supply (find out by plugging in another appliance);
- If your appliance is still not working properly after making the above checks, contact the nearest service centre.

To obtain fast service, it is essential that when you apply for it you specify the model and serial number of your appliance which can be found on the guarantee certificate or on the rating plate located inside the appliance, on the bottom left-hand side.

INSTALLATION

Location

The appliance should be installed well away from sources of heat such as radiators, boilers, direct sunlight etc.

Ensure that air can circulate freely around the back of the cabinet. To ensure best performance, if the appliance is positioned below an overhanging wall unit, the minimum distance between the top of the cabinet and the wall unit must be at least 100 mm. Ideally, however, the appliance should not be positioned below overhanging wall units. Accurate levelling is ensured by one or more adjustable feet at the base of the cabinet.

Attention

It must be possible to disconnect the appliance from the mains power supply; the plug must therefore be easily accessible after installation.

Electrical connection

Before plugging in, ensure that the voltage and frequency shown on the serial number plate correspond to your domestic power supply. Voltage can vary by $\pm 6\%$ of the rated voltage.

For operation with different voltages, a suitably sized auto-transformer must be used.

The appliance must be earthed.

The power supply cable plug is provided with a contact for this purpose.

If the domestic power supply socket is not earthed, connect the appliance to a separate earth in compliance with current regulations, consulting a specialist technician.

The Manufacturer declines all responsibility if the above safety precautions are not observed.

This appliance complies with the following E.E.C. Directives:

- **87/308 EEC** of 2/6/87 relative to radio interference suppression.
- **73/23 EEC** of 19.2.73 (Low Voltage Directive) and subsequent modifications;
- **89/336 EEC** of 3.5.89 (Electromagnetic Compatibility Directive) and subsequent modifications.

Rear spacers

In the bag with the documentation, there are two spacers which must be fitted as shown in the figure .

Slacken the screws and insert the spacer under the screw head, then re-tighten the screws.

Door reversibility

Before carrying out any operations, remove the plug from the power socket.

To change the opening direction of the door, proceed as follows:

- To carry out the following operations, we suggest that this be made with another person that will keep a firm hold on the door of the appliance during the operations.
- Open the door with the appliance in the upright position. Unscrew the screws and remove the upper door plastic trim.
- Remove the little plastic cover from the door plastic trim and refit on the opposite side (d).
- Lay down the appliance back side down.

- Remove the screw of the hinge cover plug (a).
- Unscrew the upper hinge and remove it (b).
- Unscrew the screw and remove the door stopper (c).

- Remove the door.
- Remove using a tool the cover (e) unscrew the lower hinge pivot (f) and place it on the opposite side.
- Reinsert the cover (e) on the opposite side.
- Reinsert the door .
- Pay attention that the front board of the door is parallel to the front board of the top.

- Fix the door stopper on the opposite side.
- Position and fix the upper hinge (that can be found in the instruction for use bag) on the opposite side .
- Fix the screw of the new cover hinge (that can be found in the instruction for use bag).

- Lift up the appliance to vertical position.
- Open the door and reposition the upper door plastic trim with screws.

- Fix the handle on the opposite side, insert the plastic plugs into the holes left open that can be found in the instruction for use bag.

Reposition, level the appliance, wait for at least two hours and then connect it to the power socket.

In case you do not want to carry out the above mentioned operations, contact the nearest After Sales Service Force.. The After Sales Service specialist will carry out the reversibility of the doors at your cost.

Warning

After having reversed the opening direction of the door check that all the screws are properly tightened and that the magnetic seal adheres to the cabinet.

If the ambient temperature is cold (i.e. in Winter), the gasket may not fit perfectly to the cabinet. In that case, wait for the natural fitting of the gasket or accelerate this process by heating up the part involved with a normal hairdrier. Lay down the appliance back side down.

EUROPEAN GUARANTEE

This appliance is guaranteed by Electrolux in each of the countries listed at the back of this user manual, for the period specified in the appliance guarantee or otherwise by law. If you move from one of these countries to another of the countries listed, the appliance guarantee will move with you subject to the following qualifications:

- The appliance guarantee starts from the date you first purchased the appliance which will be evidenced by production of a valid purchase document issued by the seller of the appliance.
- The appliance guarantee is for the same period and to the same extent for labour and parts as exists in your new country of residence for this particular model or range of appliances.
- The appliance guarantee is personal to the original purchaser of the appliance and cannot be transferred to another user.
- The appliance is installed and used in accordance with instructions issued by Electrolux and is only used within the home, i.e. is not used for commercial purposes.
- The appliance is installed in accordance with all relevant regulations in force within your new country of residence.

The provisions of this European Guarantee do not affect any of the rights granted to you by law.
